

### **Plast Eurasia Istanbul Fair Preparing To Be Chosen By The Industry For The 33rd Time**

Plast Eurasia Istanbul 2024, the 33rd International Plastics Industry Fair is preparing to gather the actors of world plastics industry under a single roof, on December 4-7, 2024. The fair will be held at Tüyap Fair and Congress Center, in collaboration with PAGEV (Plastics Industrialists Research Development and Education Foundation) and organized by Tüyap and it will retain its position as the leading fair of the industry by maintaining a stable growth.

As the biggest plastics industry fair organized in Eurasia on an annual basis, Plast Eurasia Istanbul Fair 2024 continues preparing to host thousands of industry professionals in both national and international arenas.

### **Major Fair Of The Industry Makes a Name For Itself Every Year**

In 2023, 1,375 exhibitors from 43 countries showcased their products and services during the Plast Eurasia Istanbul Fair, which offers a commercial environment extending over a vast geography, and found the opportunity to strengthen its brand image, make new business connections and gain worldwide recognition. 67,249 professional visitors from 118 countries met key players of the industry, where 16% of the total number of visitors consisted of foreign visitors. Industry representatives who will meet for the 33rd time this year will get the chance to view the most advanced technologies and the latest products and services in the plastics industry under a single roof.

### **Thousands Of Product Ranges to be Exhibited at Plast Eurasia Istanbul; The Center of Technology and Innovation**

Plast Eurasia İstanbul, the most prestigious plastics industry fair in the Eurasia region which shapes the future of the plastics industry intends to break its own records this year, again, in respect of the number of exhibitors, exhibition halls and visitors. The Fair will showcase a wide variety of products, including plastics machinery, machinery equipment and sub-industry products, molds, recycling technologies, heat and control devices, automation systems, cooling systems, raw materials and chemicals, and semi-finished goods.

The leading fair of the plastics industry will continue shaping the future of the industry by bringing together the latest trends and solutions in the industry.

### **Free Ticket Advantage Continues**

Do not miss the chance of viewing thousands of products that will be exhibited by the leading brands of the plastics industry and use the free ticket opportunity that will last until September 9 to join this excitement and keep up with the pulse of the industry!
